

DAYWORK RATES

Daywork rates will only be used as a basis for payment when normal rates for supply and fix (as given in the following Bill of quantities) are not applicable. No work shall be carried out on Daywork basis except when ordered in writing by the Superintending Officer.

When work is so ordered the Contractor shall paid Daywork Prices plus 15% which shall include for the use of all ordinary plant, tools and scaffolding, supervision, establishment charges and profit. Daywork prices materials, plant and labour for the work concerned.

The Contractor shall produce for verification to the S.O vouchers specifying the time and materials, employed on the work. If required, the Contractor shall also produce his receipted bills and wages book in support of his accounts.

Where special mechanical plant is required for use on Daywork, the S.O's approval must be obtained and the cost to be paid to the Contractor must be agreed before commencement of work. Only such plant that the S.O as accepted as special mechanical plant before commencement of work will be considered for payment as special plant on daywork basis.

The cost of any materials supplied by Government for use on Daywork shall not be taken into account when calculating the amount on which the 15% addition is based.

Only time on work actually done will be allowed. A "Day" is considered to be normal working day of 8 hours. Fractions of a day will be paid for 'pro-rata'.

Rates for power driven tools are not included in the labour rates but charges for hand tools shall be deemed to be included.

DAYWORK RATES (CONT'D)

The following rates are to be wages paid to workmen actually involved in the work and exclusive of all men employed in a supervisory capacity. The wages shall include EPF and such other payment as are required by law.

An amount, equivalent to fifteen percent (15%) of the rates inserted below, is payable to the Contractor to cover for the use of all ordinary plants, tools and scaffolding and for supervision, overheads and profit. The rates inserted below will form the basis of payment for Day Work in accordance with Clause 25(d) of the Condition of Contract.

BASIS PLANT CHARGES IN CONNECTION WITH DAYWORKS

The Contract Rates for plant in the Schedule of Dayworks shall apply to all plant whether belonging to the Contractor or hired by him and shall cover all the Contractor's obligations whatsoever in providing and maintaining such plant at the place of work including all fuel and lubricants, all ancillary equipment necessary for efficient operation and use of the plant overheads and profits but excluding operators.

The Contract Rates for plant shall apply both to plant which is already available at site and to plant brought to site especially for daywork but in the latter case the Contractor shall be paid his additional cost in transporting such plant to and from the site.

The daily rates in the Schedule are not intended to establish minimum charges. The rates should be applied to the time during which the plant is actually engaged in daywork. The inclusion of an item of plant in the Schedule does not necessarily deem not indicate that the item is chargeable.

Rates for other plant not included in the Schedule shall be settled at prices reasonably related to the rates so included.

DAYWORK RATES (Cont'd)

ITEM	DESCRIPTION	RATE (RM) PER DAY (8 HOUR)
1.	<u>LORRY</u>	
	Isuzu Lorry	5 Ton
	Isuzu Lorry	10 Ton
